BarkeepApp

When you run a Usage Report with your iPad or iPhone in Barkeep, the Report you email to yourself, as an Excel spreadsheet, may show unexpected price increases for some of your Inventory Items.

BarkeepOnline

When you run a Usage Report, a Variance Report and/or a Pour Cost Report. The Reports also may show unexpected price increases for some of your Inventory Items.

Why is it showing a price increase? Reports show a price increase when the average price that you paid for a particular product is higher than the Default Item Price (indicating a price increase). The Received Price paid will be displayed in red in the Excel spreadsheet (see below). The example is from a Variance Report showing you paid more for bottles of Absolut Vanilla than the price you have listed for the Item in Barkeep. Also note, on the same line in the spreadsheet, that the start price was \$24.00 per bottle and the received price was \$29.08

Category	Item	Price	Start	Start Price	Start Value	Received	Received Price	Received Cost	Waste	Waste Cost
Call Liquor	Absolut 750ml	\$18.00	7	\$18.00	\$126.00	24	\$18.00	\$432.00	0	\$0.00
	Absolut 1l	\$25.50	0	\$0.00	\$0.00	0	\$0.00	\$0.00	0	\$0.00
	Absolut Brooklyn 1l	\$24.54	3	\$24.54	\$73.62	0	\$0.00	\$0.00	0	\$0.00
	Absolut Mandarin Vodka 1l	\$24.00	1	\$24.00	\$24.00	0	\$0.00	\$0.00	0	\$0.00
	Absolut Peach Vodka 1l	\$23.99	8	\$24.00	\$192.00	0	\$0.00	\$0.00	0	\$0.00
	Absolut Pear Vodka 1l	\$25.40	8	\$25.40	\$203.20	0	\$0.00	\$0.00	0	\$0.00
	Absolut Vanilla Vodka 1l	\$24.00	11	\$24.00	\$264.00	12	\$29.08	\$348.96	0	\$0.00
	Bacardi 151 1l	\$21.45	6	\$21.45	\$128.70	0	\$0.00	\$0.00	0	\$0.00
Bacardi 8 Anos 1l	\$23.90	12	\$23.90	\$286.80	0	\$0.00	\$0.00	0	\$0.00

Why do the Reports show a Price Increase?

Below are some common explanations that might explain the higher price:

- ✓ **Receiving Inventory Errors** – You may have entered an incorrect price for the Item. It's good to double check that the Invoice Amount you enter for the Receiving Inventory matches the amount on your Supplier's Invoice.
- ✓ **Price Increases** – If your Supplier has increased an Item price, you need to edit the Item's information and update that price for the Item. You can do this during a Receiving Inventory when you enter the new price but be sure to select to make the new price the default price. 

- ✓ **Different Suppliers** – You probably have different Suppliers for different Items or Item Categories (e.g., Beer, Wine, etc.). Sometimes you cannot use your regular Supplier for an Item. That other Supplier may charge a different price.
- ✓ **Missing Discounts** – Often you can negotiate discounts from your Suppliers. You should enter the discounted price as the default price for an Item. If the Supplier charged you the regular price without the discount, your Reports would show this amount in red as a price increase.
